Clean Water Action

Clean Water Action works with residents, businesses, and municipalities throughout the Commonwealth to support renewable energy and to capture energy efficiency savings. CWA is committed to cleaning up our air and promoting economic stability by developing clean energy solutions that benefit both people and the environment. CWA was among the first organizations recognizing that aggressive advocacy is critical to ensuring the future for us, our children and our children's children.

MIP&L has had the pleasure of working with CWA in prompting the Clean Energy Choice program, as well as on a variety of efforts encouraging state and local officials (both appointed and elected) to do the right thing via public action to ensure a sustainable world.

Thank you for your environmental stewardship.

Thomas E. Nutt-Powell
President

Signed on this twenty-eighth day of April, 2009.
